### **Mack Technologies Achieves AS9100 Certification**

**WESTFORD, MA, June 30, 2008 – Mack Technologies** is pleased to announce that the quality management system at their Westford, Massachusetts, facility has been independently audited and certified to be in compliance with the requirements of the AS9100 quality standard for designers and manufacturers of equipment for aerospace applications.

AS9100 is a set of requirements for quality management systems that include all ISO 9001:2000 requirements, and is expanded to address international aerospace requirements that are now approved by major aerospace and defense companies worldwide. Mack achieved certification following an extensive audit which focused on meeting a rigorous set of industry-specific requirements. National Quality Assurance (NQA), an accredited registrar, carried out the third-party assessment and certification.

“Mack Technologies is pleased to augment our existing ISO 9001:2000, and ISO 13485:2003 certified internal quality system with certification to the AS9100 standard” commented John Kovach, President of Mack Technologies. “Part of our strategy is to be able to support the electronics manufacturing requirements for demanding aerospace and military products, and AS9100 certification demonstrates our ability to meet the highest levels of quality throughout our operations. In addition, certification to the AS9100 standard further exhibits our commitment to support the manufacturing and supply needs of our current and future customers in the aerospace, avionics, and military industries.”

#### **ABOUT MACK TECHNOLOGIES, INC.**

Mack Technologies is a leading provider of complex contract manufacturing services including printed circuit board assembly, electromechanical assembly, and full system assembly. Mack provides manufacturing solutions for original equipment manufacturers in the military, aerospace/avionics, medical, communications, and industrial controls markets. Headquartered in Westford, MA, the company also operates facilities in Melbourne, FL and Juarez, MX. For further information, visit [www.macktech.com](http://www.macktech.com).
