Mack Technologies Recognized for 5th Consecutive Year in *Circuits Assembly* Service Excellence Awards

Also takes highest overall category rating for 3rd straight year, further underscoring its ongoing commitment to customer satisfaction

WESTFORD, Mass. April 7, 2010 – Mack Technologies, Inc., a leading supplier of [printed circuit board assembly](#), [systems assembly](#) and [electronics contract manufacturing services](#), announced today that, for the third consecutive year, it has received the highest overall award in the electronic manufacturing services (EMS) category in *Circuits Assembly* magazine's annual Service Excellence Awards (SEA) program. In addition, Mack Technologies has now been recognized in the SEA program for five consecutive years. The awards were presented at the annual IPC APEX trade show in Las Vegas earlier this month.

The top SEA honors go to companies that, like Mack Technologies, received the highest ratings, as judged by their own customers, in each of the qualifying categories:

- Manufacturing Quality
- Technology
- Dependability/Timely Delivery
- Responsiveness
- Value for Price

Circuits Assembly magazine acts as an independent third party to solicit direct feedback from contest entrants' customers to determine the competition results. Mack Technologies won the top prize in the grouping of EMS companies with annual revenue greater than \$100 million.

“The bar for consistently meeting customer expectations for service quality moves higher every year in our dynamic and demanding industry, which makes receiving this award for the third straight year such a gratifying accomplishment,” said John Kovach, President of Mack Technologies, Inc. “At Mack Technologies, we center our existence on a deep commitment to exceeding customer expectations. We continue to use customer feedback from the SEA program to further refine our operations and processes to ensure customer satisfaction. I salute all of our employees for their dedication to supporting our customers.”

ABOUT MACK TECHNOLOGIES, INC.

Mack Technologies is a leading provider of complex contract manufacturing services including printed circuit board assembly, electromechanical assembly and full system assembly. Mack provides manufacturing solutions for original equipment manufacturers in the military, aerospace/avionics, medical, communications, and industrial controls markets. Headquartered in Westford, MA, the company also operates facilities in Melbourne, FL, and Juarez, Mexico. For further information, visit www.macktech.com.
